# Handycoat®

## Interior Stucco Putty

### Ready mixed filler for interior use

**Handycoat Interior Stucco Putty** is a ready to use filler and skimcoat for all common types of building surfaces. It has extra fine particle size to give a high quality even surface for painting. Handycoat Stucco Putty is specially manufactured for the painter to repair and touch up interior surfaces, both old and new, prior to painting.

Filling

Skimming

### Benefits

- Ready mixed
- Inherent flexibility
- Alkali resistant so no need for primer / sealer
- Minimal shrinkage
- Vapour permeable
- Excellent adhesion
- Natural finish
- Water based
- Environmentally friendly

### Areas of use

- Cementitious substrates
- Gypsum boards
- Wood
- For skimming walls and ceilings
- Repairing damages, cracks or nail holes
- Making good around door and window architraves
- Filling along the top of skirting boards

### Areas of use

Apply the filler in a thin even layer. Apply two coats if necessary, allowing to dry between layers. Lightly sand down the final surface before painting, preferably within 24 hours of application.
